## **Seminole Office Solutions Leverages Powerful Artificial Intelligence Anti-Phishing Technology to Keep Email Inboxes Safe**

*Leading MTSP Shares Why Email Is an Easy Way to Destroy A Company's Network*

LONGWOOD, FL – April 28, 2025 - Seminole Office Solutions, a leading managed technology services provider (MTSP), recently announced that they are protecting small to mid-sized businesses (SMBs) with their innovative new AI (Artificial Intelligence) anti-phishing technology which is designed to protect businesses from cyberattacks through the most prevalent tactic, email phishing. Phishing is the fraudulent practice of sending emails purporting to be from reputable companies in order to get individuals to reveal personal information, such as company data, passwords or credit card numbers.

Business owners have been hearing about the substantial increase in cybercrime in recent years with many attacks successfully breaching major infrastructure systems and gaining mainstream media exposure. While some cybercriminals prefer to target larger organizations, many of those organizations have responded by investing heavily into cybersecurity solutions to fortify their defenses to such a high level that they become less appealing targets. As those larger companies form a stronger “barrier to breach,” cybercriminals have shifted their focus to smaller businesses who

possess very weak infrastructure and little to no cybersecurity. However, Seminole Office Solutions is taking a stand against these threats by deploying new AI-based solutions, like their anti-phishing technology, to protect the inboxes, identities and futures of small businesses.

“Unfortunately, human error is one of the leading reasons that a business is affected by cybercrime,” stated Brian Willcox, Vice President of Seminole Office Solutions. “While employee education and awareness training is always beneficial, after protecting SMBs for years, we’ve found that one of the fastest, most effective and easy-to-implement ways to minimize organizational risk significantly is to limit employee access to phishing emails in the first place. When you automatically filter out suspicious-looking emails from ever reaching your employees you remove the possibility of human error altogether. One of the reasons an AI-powered solution is so important here is because your app is constantly learning from the aggregate data, becoming smarter and more efficient every second that you have it turned on. We generally explain the difficult to quantify, yet unmistakably powerful capability of AI by asking people if they’ve ever played chess against their computer on the ‘Hard’ level. How many times have

you beaten it on “Expert” mode. That’s basically what our cybersecurity solutions are all focused on achieving for our customers.”

It turns out that the data supports Seminole Office Solutions’s approach in that, “43% percent of cyberattacks are aimed at small businesses, but only 14% are prepared to defend themselves,” according to Accenture. From a business owner’s standpoint, the risk simply outweighs the reward, in that most organizations (60%) go out of business within 6 months, according to Inc.com.

Fortunately, the costs to secure your organization are nominal in comparison to the liability they instantly eliminate, not to mention the “peace of mind” that business owners gain by addressing this directly. While phishing is the most common form of attack it’s also prudent to ensure that your cybersecurity solution also protects you from malware, data loss, anomalies, and other methods of cyberattack. “Another key differentiator to look for in any malware or phishing defense tool you want to use is to make sure that your defense system is one that is invisible to hackers. You want to add in as many layers of security as you can to increase the amount of friction a hacker must endure to breach your company. This increases their likelihood of just

looking elsewhere for a weaker infrastructure to target. However, each organization has different risk factors, budget considerations and levels of exposure, all of which must be tailored to fit the organization's needs in the most appropriate manner," closed Willcox

## **ABOUT SEMINOLE OFFICE SOLUTIONS**

Celebrating 40 years of innovation and service, Seminole

Office Solutions stands as a leading Managed Technology Services Provider (MTSP) dedicated to enhancing efficiency, productivity, and security for local businesses across various industries since its establishment in 1984. Committed to proactive adaptation to emerging client needs, Seminole offers a diverse range of solutions, from managed IT services, cloud, security and VoIP phone solutions via their MSP division, dba SemTech IT Solutions, to business process automation solutions and

imaging and print hardware. With a focus on helping clients succeed, Seminole remains an independent, forward-thinking provider poised to meet the evolving technological demands of Central Florida's businesses for years to come. To learn more about our products, solutions, and support please contact Seminole Office Solutions at 407-830-7950 or visit [www.sosfla.com](http://www.sosfla.com), SemTech IT Solutions at 407-830-1434 or visit [www.semtechit.com](http://www.semtechit.com).
